It's all starts with *eyebrows*

The brand Christian was founded in 1996. It started with semi-permanent eyebrow make-up powders in 8 colours and became an instant worldwide success! For then 10 years this was a very unique novelty in the world of semi-permanent make-up. Christian since then has build a solid customer base. Stencil sets with specific eyebrow shapes are invented by Christian and nowadays a common use, among woman worldwide, many times copied but never as good!

From 2006 the brand really starts to expand with more products and also sold to more countries around the globe. Every year there has been product launches and currently the portfolio is about 75 sku and is available in over 70 countries worldwide by appointed distributors to build the brand.

In 2014 we have rebranded from "Christian" to "Christian Faye" to be better found on social media and to have a worldwide trademark registration. The current concept is called Eye-for-Eyes, which implicates that this range of make-up products and accessories are mainly to be used around the eyes. Although this is no limitation for future activities.

Christian Faye is a real Dutch brand and lived by team of extremely dedicated people, who like to offer the best quality and service possible. That is in our genes! We always try to improve ourselves and are open minded for any new development. Our goal is to develop, produce and supply "easy to apply" products which last the whole day in perfect condition, even in difficult situations.
